

Community Solar Rate

Local. Sustainable. Partnership.

Local

Purchasing local solar through Trico is an easy way to invest in a green future for YOUR community.

Sustainable

Participating in this rate helps reduce carbon emissions and promote clean energy.

Partnership

Our Community Solar is owned by you, our Members, in partnership with Trico.

How does it work?

Members participating in this rate can purchase 100% of their power from Trico's Avion or Chirreon Solar and Battery Storage Facilities for about an additional \$0.025 per kWh.

This rate is ideal for Members who want to invest in their local community and sustainable energy.

Frequently Asked Questions

1. Where are the solar facilities located?

Chirreon & Avion Solar are both 10MW solar generation systems with 15 MW battery storage systems. Chirreon is located near Saddlebrooke, AZ, and Avion is in Marana, AZ.

2. How much more will I spend per month on my energy usage?

The average residential user can expect an increase of approximately \$41 per month, depending on individual usage each month and the time of year.

3. How do I know if this rate is right for me?

This rate provides an option for Members who want to invest in renewable energy that is generated locally. This rate might be right for you if:

- You want to support generation of electricity in your local community.
- You want to be served with renewable energy without having to purchase a home solar generation system.
- You want to reduce carbon emissions.
- You're invested in supporting a sustainable future in your community.
